

ceraMotion®  
One Touch

*Esthetic Innovation*

my first  
ceramic  
in paste

ceraMotion® One Touch is the first veneering ceramic in paste form. The 2D and 3D pastes have been specially developed for the quick and aesthetic finish of all-ceramic restorations made of lithium disilicate and zirconium oxide.

smart.  
fast.  
aesthetic.

**Smart.** What you see is what you get.  
**Fast.** All in one firing.  
**Aesthetic.** Natural translucency, opalescence and fluorescence.

The complete ceraMotion® One Touch system.

Paste 2D

Paste 3D

**Paste Glaze**

Colorless glazes in transpa and bright.

**Paste 3D Incisal**

Incisal pastes for layering with natural in-depth effect.

**Paste 3D Dentin**

Thanks to the combination of larger ceramic particles with a thixotropic paste it is possible to create an individual morphology in the dentin and incisal area.

The **translucency** of the 2D pastes maintains the light dynamics.

**Paste 2D Incisal**

**Paste 2D Modifier**

The particle size of the 2D pastes is ideally suited to deliver a **homogeneous** and natural finish to the surface.

**Paste 2D Body**

Simple and precise adaptation of the desired tooth shade (VITA classical® A-D, VITA 3D-Master®\*\* and individual shades).

**Paste 3D Opal**

Natural **opalescence**

Shade-coordinated 3D paste with an opalescent effect for individualization.

**Paste 3D Gingival**

For a perfect copy of **nature**

All ceraMotion® One Touch pastes are fluorescent and have been adapted to reflect the **fluorescence** of natural teeth.

"When the fine tip of our brush comes in contact with the pastes, it creates a **symphony of forms and fissures**. It also produces the **subtle effects**".
