Die Angaben entsprechen dem prozentualen Anteil des Liquid und der Auswahlmöglichkeiten in der Software Ceramill Mind.

Die Vorgehensweise zum Einfärben von anatomisch reduzierten Gerüsten aus Ceramill ZI und Ceramill ZOLID (Tauchtechnik) und vollanatomischen Arbeiten aus Ceramill ZOLID (Pinseltechnik) ist in der Gebrauchsanweisung Ceramill Liquid beschrieben.

#### Hinweis zu Ceramill ZOLID:

Im Ceramill M-Center werden alle verblendbaren Gerüste in der Grundfarbe, und alle vollanatomischen Arbeiten in abgeschwächter Grundfarbe (40 % Grundfarbe/60 % dest. Wasser) komplett getaucht.

*The specifications made correspond to the percentage share of the liquid and the selection modes offered in the software Ceramill Mind.*

*The technique for staining anatomically reduced Ceramill ZI and Ceramill ZOLID frameworks (immersion technique) and fully anatomical Ceramill ZOLID restorations (brush technique) is described in the Ceramill Liquid instructions for use.*

#### Information about Ceramill ZOLID:

*In the Ceramill M-Center all veneerable frameworks are fully immersed in the base shade and all fully anatomical restorations are fully immersed in diluted base shade (40 % base shade/60 % distilled water).*

*Les indications correspondent au pourcentage de la partie de « Liquid » et des possibilités de sélection dans le logiciel Ceramill Mind.*

*Les instructions sur la coloration des armatures anatomiquement réduites en Ceramill ZI ou Ceramill ZOLID (technique par immersion) et sur les travaux entièrement anatomiques en Ceramill ZOLID (technique du pinceau) figurent dans le mode d'emploi de Ceramill Liquide.*

**Notes sur Ceramill ZOLID:**  
*Toutes les armatures à revêtement cosmétique seront immergées complètement dans la teinte de base au centre Ceramill M; tous les travaux entièrement anatomiques seront immergés complètement dans la teinte de base atténuee (40% de teinte de base/60% d'eau distillée).*

**Le indicazioni corrispondono alla percentuale di Liquid e alle possibilità di scelta nel software Ceramill Mind.**

**La procedura per la colorazione di strutture di Ceramill ZI anatomicamente ridotte (tecnica dell'immersione) e di lavori di Ceramill ZOLID completamente anatomici (tecnica della pittura), è descritta nelle istruzioni per l'uso di Ceramill Liquid.**

**Informazione riguardo Ceramill ZOLID:**  
*Nel Ceramill M-Center tutte le strutture da ricoprire con ceramica sono completamente immerse nel colore di base, e tutti i lavori completamente anatomici nel colore di base diluito (40 % colore di base/60 % acqua distillata).*

**Las indicaciones corresponden a la parte porcentual del Liquid y a las posibilidades de selección en el programa Ceramill Mind.**

**El procedimiento para el coloreado de estructuras anatómicamente reducidas de Ceramill ZI y Ceramill ZOLID (técnica de sumersión), así como de trabajos de anatomía completa realizados en Ceramill ZOLID (técnica de pincel) está descrito en las instrucciones de uso del Ceramill Liquid.**

**Observación respecto a Ceramill ZOLID:**  
*En el Ceramill M-Center se sumergen completamente todas las estructuras recubribles en el color base y todos los trabajos de anatomía completa en el color base diluido (40% de color base/60 % agua dest.).*
