

hatho HABRAS Disc Pro

Heavy duty „brush shaped polishing discs“ for best performance

Acrylic Dentures

Extensive and fast pre-polishing of acrylic dentures

5,000 rpm

Soft Denture Reline Material

Soft denture reline material is easy to polish with the new HABRAS Disc Pro series.

HABRAS Disc Pro are brush shaped mounted polishing discs. They consist of soft polyamide in which abrasives are embedded. The unique brush design of these discs and their colour indicated abrasiveness enhance their effectiveness. From fine grinding, through pre-polishing up to fine polishing, these **HABRAS Disc Pro** have many applications. **HABRAS Disc Pro** are used at 5,000 rpm without any additional polishing compound.
