CPUHDP	Parchment	1kg

Please scan this QR for technical printing specifications, post-processing information (irrespective of whether you are using an ultrasonic or not) and to even order your first bottle!

"We were recently invited to try the Centri Print UHD graphite and parchment. The resin is comparable with other model resins of a much higher price bracket, overall a fantastic resin for the price. Easily a 10/10."
- PAUL

Only £36.95

INTER CURE PROCESS UNIT

Our **NEW** Inter Cure processing unit is made from plastic coated galvanised steel with a new heater that heats up quicker than ever and with a fully insulated tank will keep the water at a much higher ambient temperature, saving time and money as the machine reaches the processing parameters quicker. With a capacity of 6 x 3 flask compressors, the machine is capable of single or two stage processing. The digital display shows the relevant temperature feedback.

SCHICK G2 CONCEPT MODEL SAW

Until now, saw cuts on many models had to be made manually due to the limited space between the preparation boundary or irregularities in the alignment of stumps. In addition to the increased risk of injury, this mode of operation can also increase the risk of damage to the plaster model and is very time consuming. The G2 Concept's power and precision dramatically reduces these issues. Once the model is placed on the saw table and fixed with two hands, the integrated line laser allows precise positioning of the cut. When lowering the saw table, the saw blade plunges into the model from below and sets a clean cut parallel to the pins. The exact depth of cut can now be determined optically by the laser guidance system. The balance of the cut line is then broken by hand at the intended break point. Since the saw cuts are parallel to each other, all model segments can be easily removed from the model.

Cutting depth maximum	26.5mm
Width of cut	0.3mm
Speed	7,500 rpm

SCHICK Q3

The new Q3 series from Schick offers unbeatably high performance parameters with up to 60,000 rpm and 11 Ncm torque. Thanks to the latest technology, the speed can be regulated extremely precisely and is therefore ideally suited for processing even the most demanding dental materials.

VERSATILE AND RELIABLE

All the information you need is clearly displayed on the bright OLED display and can be easily read from all angles. Additional functions such as forward/reverse and cruise control are easily activated using direct selection buttons on the control unit.

WELL BALANCED

The ultra-light and ergonomically perfectly balanced motor hand piece, already known from the QUBE II, prevents symptoms of fatigue in the wrist and provides the user with maximum support in their daily work in the laboratory.

RENFERT SIMPLEX

The new SIMPLEX dental 3D filament printer is intuitive and simple. With its unique advantages, the SIMPLEX stands out from other contemporary solutions. With the dental slicer software you can reliably print models that meet processing requirements and do not pose a risk either to health or to the environment. Ideal for orthodontics, utilising the filament models in conjunction with orthodontic acrylic.

- ★ Reliable and easy to use thanks to the "Plug and Print" concept
- ★ High precision thanks to a level resolution of up to 50µm
- ★ Extremely quiet (49dB)
- ★ Processing reliability thanks to a filament monitoring system
- ★ Easy to use because of the dental slicer software
- ★ No post-processing (no cleaning, no curing)
- ★ Low printing and material costs

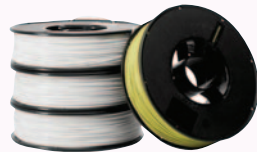

Code	Size	Dimensions
87R17350000	16.3kg	635 x 415 x 500mm

ANEXSIL

Addition curing silicone (polyvinylsiloxane) suitable for scanning with optical/laser/tactile scanning systems. The material is multifunctional and adapts perfectly to all techniques. The long working time allows the perfect positioning with extreme ease, without incurring risks of pre-hardening. The shore hardness of 70 (red)/90 (blue) is reached in a short time, making it suitable for use with any moulding technique.

- ★ Easy and clean mixing thanks to 1:1 dosage
- ★ High viscosity and workability
- ★ Long working time
- ★ Scannable
- ★ Suitable for moulding techniques
- ★ High detail definition (40µm)
- ★ Final hardness reached in short time
- ★ High resistance to compression
- ★ Compatible with self and heat curing acrylic resins
- ★ Heat resistance over 120°C
- ★ Millable
- ★ High colour contrast
- ★ High dimensional stability

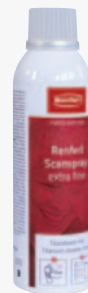

Also available in 5kg + 5kg & 10kg +10kg formats.

RENFERT SCANSPRAY EXTRA FINE

Newest family member of the Scanspray range, this extra fine version has a significantly reduced layer thickness for increased definition of the scan. Suitable for implant cases where an increase in the sharpness and detail is required. Excellent edge detail and can be removed without residue – excellent partner to the standard Scanspray.

Code	Size
87R17312000	200ml

Only £47.21 saving 25%

GHENESYL MONO

Ghenesyl Mono, is a new impression material with a medium viscosity, ideal for the monophase technique. Recommended for crown and bridge impression taking, implants, inlays, onlays, partial and total edentulous. Thanks to its viscosity it can be used directly on the surface that needs to be reproduced or on an impression tray.

Due to its incredible flexibility, Ghenesyl Mono can, easily be removed from the oral cavity without structural alteration.

- ★ Ideal viscosity for monophase technique
- ★ High accuracy (5µm)
- ★ Maximum thixotropicity and hydrophilicity
- ★ Fast in mouth setting time (90 seconds)
- ★ High resistance to tear (60 shore)
- ★ High elastic recovery (99.9%)
- ★ Good working time (120 seconds)
- ★ High dimensional stability over time
- ★ Mint flavour

3D PRINTING (WORKFLOW DESIGN AND PRINT)

Location East Sussex **Duration** 7 hours
Level Verified CPD **Cost** £140
One day course, showing the basics of model creation, printing and post-processing. Utilising our printing technology you will get a better understanding of creating a dental model quickly and efficiently.

BASIC DIGITAL WORKFLOW

Location East Sussex **Duration** 7 hours
Level Verified CPD **Cost** £140
This course will cover all aspects of the digital workflow. Whether you are new to digital technologies or an experienced user, this course will aid you in planning the complete workflow and help to change your business from analogue to digital.

CAST PARTIAL DENTURES BASIC

Location East Sussex **Duration** 7 hours
Level Verified CPD **Cost** £299
Showcasing the latest in chrome framework design and creation techniques. Using all of Dentaureum's trademark products this course will be beneficial to every technician of all ages and experiences.

CAST PARTIAL DENTURES ADVANCED

Location East Sussex **Duration** 7 hours
Level Verified CPD **Cost** £299
Advanced course (or can be booked as part of a two day package with the basic course), that is part of a highly technical day that will showcase solutions for more complex cases and the required design. Using all of Dentaureum's trademark products this course will be beneficial to all technicians.

CERAMOTION ONE TOUCH

Location East Sussex **Duration** 7 hours
Level Verified CPD **Cost** £299
Ceramotion one touch is a revolutionary system of 2D and 3D pastes that have been specially developed for the customisation of all monolithic restorations made of lithium disilicate and zirconia. This course will showcase the original paste glaze concept, learning staining and characterisation techniques.

DIGITAL IMPLANT RETAINED BRIDGES (MGIN)

Location East Sussex **Duration** 7 hours
Level Verified CPD **Cost** £140
The course will show you all aspects of creating a REAX (Reliable- All-On-X) implant bridge using Ceramill M-gin. Covering the importance of the correct scanning technique, design and nesting.

DREVE ADVANCED MOUTHGUARD

Location East Sussex **Duration** 7 hours
Level Verified CPD **Cost** £399
This full day course will provide delegates with the chance of becoming the first technicians in the UK to learn the new professional 3D mouthguard technique.

FUNDAMENTALS OF SCANNING

Location East Sussex **Duration** 7 hours
Level Verified CPD **Cost** £140
This full day course will cover the basic aspects of all things relating to scanning. Utilising the latest technologies from Amann Girrbach and Dentaureum, you will be shown how to setup different types of scanners, understanding the difference between them, scanning multiple items, articulated models, impression materials and everything in between.

HANDS-ON DENTURE CHARACTERISATION WITH VITA

Location East Sussex **Duration** 7 hours
Level Verified CPD **Cost** £299
Using the light curing composite stains VITA AKZENT LC and different gingival shades of the veneering composite VITA VM LC flow and paste in combination with the Vitapan Excell, Lingoform and VITA Physiodens teeth.

INTRODUCTION TO TCS KARADENT

Location East Sussex **Duration** 7 hours
Level Verified CPD **Cost** £199
This one day course is ideal for those who have, or have not had any previous experience with TCS Karadent. It will provide an introduction to the TCS Karadent denture system, and its advantages over acrylic or cold cure dentures. Structured around a limited group, each delegate will gain a working knowledge with practical hands on experience.

INTRODUCTION TO TCS FLEXIBLES

Location East Sussex **Duration** 7 hours
Level Verified CPD **Cost** £199
This one day course is ideal for those who have, or have not had any previous experience with the TCS Flexible Denture System. It will provide an introduction to the system and its advantages over acrylic or cold cure dentures. Structured around a limited group each delegate will gain a working knowledge with practical hands on experience.

LASER WELDING

Location East Sussex **Duration** 5 hours
Level Verified CPD **Cost** £199
Hands on course showcasing the laser welding technique and the technical benefits. Each attendee will get practical experience of using the Dentaureum Compact Laser Welder.

SLEEPWELL (SNORING DEVICE)

Location East Sussex **Duration** 4 hours
Level Verified CPD **Cost** £140
An overview of Snoring and OSA, and the treatments available. Looking at the development of MAS over the years and the efficacy of currently available devices. How can dental technicians play a role in the provision of this life changing treatment? This will be a mixture of theory and practical. You will get to make and take away your own snoring device/appliance.

THE VITA SHADE MATCH FORMULA

Location East Sussex **Duration** 7 hours
Level Verified CPD **Cost** £299
Hands-on, one day course showcasing the latest veneering technologies with VITA LUMEX® AC on VITA AMBRIA® PRESS. This veneering course will demonstrate how utilising the combination of these materials will give you the ultimate aesthetic combination.

VITA SHADE TAKING, ADVANCED STAINING AND GLAZING OF VITA CADCAM MATERIALS

Location East Sussex **Duration** 7 hours
Level Verified CPD **Cost** £299
Using VITA AKZENT Plus for all VITA ceramic restorations and the new light-curing composite stains VITA AKZENT LC. You will be trained by the shade experts, Vita and this unique course will be an incredible opportunity to learn the latest techniques.

Win an Incredible **MATE X BIKE**

With a 750W motor, up to 60m range, colour display and hydraulic brakes

The all new **MATE X**, go ahead and venture off the beaten path.

Aircraft grade 6061 aluminium frame, all-terrain fat tires and full suspension, you are prepared for any adventure. Keeping you in control at all times are its superb disc brakes with fingertip modulation. Packed with smart features for taking any ride to the next level of freedom and pleasure.

- ✪ 9 speed computer display with integrated 5V charging port
- ✪ 8 speed gears
- ✪ Front and rear suspension – front with lockout and preload adjustment
- ✪ Foldable stem, frame and pedals
- ✪ 20 x 4.0 All-terrain tires with Schrader valve
- ✪ Disc brakes
- ✪ Comfortable saddle
- ✪ Easily adjustable saddle/handlebar height

Buy any item from this offer sheet and you will be automatically entered into a prize draw to win the amazing **MATE X Bike**.

The draw will take place on April 1st 2022 and the owner of the winning laboratory will be notified on that day once the verification process has taken place. Competition rules apply and these can be viewed at www.whwplastics.com/competition.

With thanks to our incredible sponsors:
