PHROZEN MIGHTY 4K

After 2 years of development, we are delighted to introduce our new 3D printer, the Phrozen Mighty 4k 405nm. With our partners at Phrozen, we have developed new printing strategies and optimised many dental digitised indications. This DLP LCD resin printer has been tailored for use with our Centri™ Print UHD resins to

make what we believe to be the most accurate and cost-effective dental models on the market. The build platform size of 200 x 125 x 220mm, is big enough to do 6 hollow models horizontally or 18 vertically, with production times of 6 in under 40 minutes @ 0.1mm. The XY resolution is 52µm so fit can be assured consistently.

The Mighty 4k represents the perfect dental solution for "just in time manufacturing". Whether you buy multiple printers or our cost effective aluminium resin vats, the Mighty 4k could be the answer you have been looking for. For full technical information please call us or visit our website.

3DP1 280 x 280 x 440mm

Need help with your installation? We offer a 2 hour support solution for only £79.95

Only £519.95 - PRE-ORDER YOUR MACHINE NOW

PHROZEN LUNA CURE

The Luna curing unit is the ideal companion to the Mighty 4k. With an inner capacity of 220 x 220 x 270mm, this unit uses UV-LEDs and rotates 360 degrees to ensure that your models are cured evenly, regardless of size. Every part of the model will get cured as the LED array ensures there are no shadows or blind spots.
