1

PHROZEN SONIC MIGHTY 8K

- Outstanding entry-level printer
- Long life Mono-LCD panel
- Etched build plate for enhanced bond
- Dual linear rail system for improved print quality and longevity
- 8K resolution
- Linear projection module means even curing of the resin
- 10" LCD panel
- Build volume of 218 x 123 x 235mm
- Fast printing – 70mm per hour
- Improved build quality and design
- Increased speed and resolution
- Cost-effective consumables and parts
- Exceptionally low maintenance costs
- ACF film as standard which means faster print times
- USB and Wi-Fi compatibility
- **Can be upgraded to a Mighty 12K for only £149.95**
- **Trade in your Mighty 4K and get a £150 voucher to spend on any Centri™ Print product**

CODE 3DP8K RRP £595.95

2

PHROZEN SONIC MEGA 8K S

- Huge build volume of 472 x 380 x 566mm
- High-capacity printer
- You can print up to 21 horizontal models in 25 minutes (100 micron)
- You can print up to 30 vertical models in 90 minutes (100 micron)
- You can print a potential capacity of 200 - 300 models per day
- Larger post-processing capacity
- Large wash & cure unit option with the possibility of washing build plate in situ
- Improved build quality and design
- Upgraded motor – more reliability and accuracy
- Built-in drip hanger to reduce resin waste
- Space-saving design with lift-up hood mechanism
- Streamlined functionality to increase productivity and reliability
- Partly automated workflow
- Automated refill
- Semi-automated drain to encourage more resin indications
- ACF film as standard which means faster print times
- High definition (if required)

CODE 3DP8KS RRP £1,245.95

3

PHROZEN SONIC MIGHTY REVO

- New feature-laden printer
- Full mobile phone integration for remote monitoring
- Smart residue detection to prevent LCD panel breaks
- Smart failure detection to prevent abnormalities when printing
- High 14K resolution and ultra-fast printing
- New auto-levelling feature allowing one-button calibration
- New built-in heater to reduce print failures as resin is temperature is optimised
- New built-in air purifier
- New built-in exhaust vent
- New built-in interior light
- 5" hi-res touchscreen panel
- New sealed motor to prevent damage from resin leaks
- New lift-up, hinged lid system
- New 1 min LCD replacement system, mitigates downtime
- Build volume of 223 x 126 x 235mm
- Excellent build quality
- USB and Wi-Fi compatibility

CODE 3DPREVO

RRP £895.95

4

RAYSHAPE EDGE E2

- Incredibly fast new printer - 40mm per hour
- Build volume of 192 x 120 x 190mm
- New 6K monochrome screen technology
- Powerful internal processing power with 1GB RAM, 8GB ROM & Cortex chipset
- Incredible accuracy of up to 90% match of scan data
- New self-cooling technology
- Smart heating technology to virtually eradicate print failures
- Inbuilt extraction to disperse resin fumes
- Over 100 verified print resins
- Proprietary nesting software
- Space-saving design with lift-up hood mechanism
- Effortlessly print over 20 dental indications
- Intuitive and simple to use
- Complete and integrated workflow available
- Open system
- Designed for dental use
- Unique lid and stack resin vat system

CODE RSCM0064

RRP £1,495.95

5

RAYSHAPE EDGE MAX

- New high-production printer
- Huge build volume of 290 x 160 x 190mm
- New 7K monochrome screen technology
- Powerful internal processing power with 1GB RAM, 8GB ROM & Cortex chipset
- Incredibly fast new printer - 36mm per hour
- New self-cooling technology
- Smart heating technology to virtually eradicate print failures
- Inbuilt extraction to disperse resin fumes
- Over 100 verified print resins
- You can print up to 30 models in 90 minutes
- You can print up to 100 gingiva components in 24 minutes
- You can print up to 16 surgical guides in 45 minutes
- Effortlessly print over 20 dental indications
- Intuitive and simple to use
- Complete and integrated workflow available
- Open system
- Designed for dental use

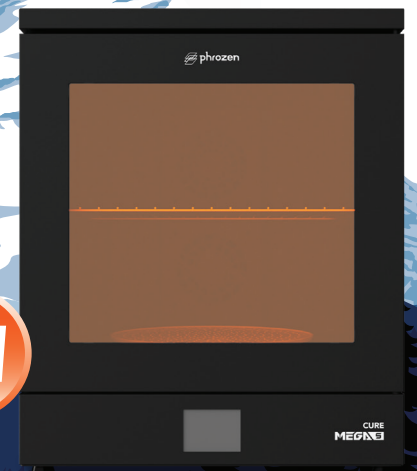

CODE RSCM0081 **RRP** £3,495.95

6

PHROZEN CURE MEGA S

- New curing unit for high-productivity
- Continuous drying and curing for easy post-curing
- Choose between dry and cure, or do both consecutively
- 360° turntable for even curing
- Dual high-speed fans
- Built-in interior light for easy monitoring
- Detachable rack to optimise curing
- Automatic shutoff feature
- User-friendly control panel with digital display
- Curing time ranges from 1-120 minutes
- Exceptionally large curing bay of 35Ø x 30cm
- Optimise post-processing with the Phrozen Wash Mega S
- Use as part of the Phrozen system or seamlessly integrates with any additive solution
- Durable construction and design
- Compatible with a wide range of resins
- Compact footprint
- Easy to clean and maintain

CODE 3DPMC **RRP** £379.95

We are a fully accredited additive service and repair centre with over 1,000 parts and consumables stocked at any time.
