CENTRI™ OXO - BIO SPECIMEN BAGS

We're excited to share that our 6 x 9" clear pocket bags have been a big hit since their launch and have quickly become a favourite among our customers. Supplied in packs of 1000, these bags align perfectly with our mission to provide cost-effective and environmentally friendly solutions for the dental trade.

Their strength and durability match that of traditional polythene bags, but with the added benefit of being biodegradable and made from 30% recycled materials. We understand that businesses want to be environmentally conscious, yet often find that greener alternatives come with a high price tag. That's why we've implemented quantity break pricing to help reduce carbon emissions from multiple deliveries while keeping affordability in mind. Thank you for embracing our eco-friendly initiative!

BIOTOUGH NITRILE GLOVES

Environmentally sustainable black gloves with a biodegradation rate of over 90% in 490 days. They decompose within five years, compared to over 100 years for regular nitrile gloves. The biodegradation process starts when they are disposed of in an active landfill. They also meet medical standards for pinholes with an AQL of 1.5 and are touchscreen-compatible. **This product is a great combination of safety and sustainability, and we are so confident you will like it, we have even given you a free sample (while stocks last)!**
